

Mobile & Internet Security Course

International Institute of Security
and Safety Management
New Delhi, India

Objective of the Course

Protect all of your Communications from Spying Eyes:

Coffee shops, Airports and Hotels with free WiFi are a road warrior's dream and potentially their worst nightmare. Even at home, you're still at risk from prying eyes. With this useful and customised program all of your communications are safe and secure. How to encrypt your browsing and communications, making everything you do invisible to anyone trying to spy on your privacy. All it takes is one click.

A New Approach :

With the world's largest mobile threat dataset and leveraging the power of millions of users, there are many viable solutions available at the IISSM to tackle the most important Mobile Security issues and Internet Security from identifying emerging threats to preventing fraud and fighting Cybercrime.

Who all should attend ?

Every User who uses Smartphone, Mobile and Internet :

In today's urban or rural India Mobile and Internet are part of day to day life. Hence, this useful one day program is strongly recommended for one and all whether Students, Executives, Govt Servants, Businessmen or Security Practitioners.

Course Director :

Brig.(Retd.) A K Pathak was commissioned into the Armoured Corps of the Indian Army in 1974. During service he held various Command Staff and Instructional Appointments. He also had the

opportunity to impart training to Post-graduate & Undergraduate Participants at two Army Schools of Instruction and retired after 35 years of service. Post retirement he has been General Manager in Paper Industry and presently employed as Directors Courses at the IISSM.

Why should you attend?

Why do you need Mobile & Internet Security?

- The changing pattern of crime in Mobile Phone & Internet in India.
- Basically, a Smartphone without proper protection puts you at risk.
- When you use Smartphone online, there's always a door open to malware and hackers. They could steal your personal data and use it to their benefit.
- The precious information you carry around with you is increasingly vulnerable to being misused by strangers. How to counter all these threats? By using Mobile Security.
- Useful Dos and Don'ts in Safety Management.
