### Baggage Scanning & Image Interpretation Course

It gives me pleasure to share that IISSM successfully conducted three days Course on Baggage Scanning & Image Interpretation from 26<sup>th</sup> to 28<sup>th</sup> Feb 2018 in consultation with our training partner (TP) Erudire Knowledge Solutions, New Delhi. The program was attended by large number of participants from CSIR – NAL Bangalore, Airborne Recruiting Pvt Ltd, Mumbai, Cruise Ship Security, Dehradun and so on. The program received an overwhelming response from the participants.

The training programme mainly comprised of two variations, Class Room Model & On Line Self Learning Model. It was a CAT (Computer Assisted Training) module with the help of a Simulator. This being three days program, the following useful topics were covered.

Relevance of access control in context of X-BIS. Overview of X-Ray machine & its functions. Major components of a basic X-ray machine. Introduction to Control Panel & its various Controls. Safety features built in the machine. Safety precautions to be followed by X-ray machine operator. Placement of items on the Conveyor Belt. Basics of Interpretation using density, chemical composition and colour coding. How to identify the dangerous items as well as dangerous items in disguise from X-Ray image. Identification of Hazardous/ Prohibited items. Baggage categorization based on X-ray interpretation. IED, its components and the technique to identify them. Familiarization of daily use items with Actual Photographs and their respective X- Ray images.

The Faculties were provided by our training partner Erudire Knowledge Solutions, New Delhi. The Faculties mainly Col S Kak (Retd) & others were rated outstanding. The program was a great success.

#### A few quotable quotes from the participants:

**Mr Bikram Singh Burathoki**, Cruise Ship Security, Dehradun.

*"Yes, Its an excellent program. We need to practice on live machine as well!"*

**Mr Deric Verghese**, Airborne Recruiting Pvt Ltd, Mumbai.

*"Very helpful & good program!"*

**Mr Murlidhar Jatt**, CSIR-NAL, Bangalore.

*"Very good program!"*

## From the Editor's Desk

Dear Viewer,

### **Greetings from IISSM!**

As we notice, there is a sudden change in the climate with temp crossing 30 degree Celsius in many parts of the country by end Feb 2018. This sudden setting in of summer also indicates that the use of electrical gadgets such as ceiling/ table Fans, Desert Coolers, ACs and so on, will be switched on early. We at IISSM always propagate that "A stitch in time saves nine". So, to avoid any untoward incident especially due to electrical fault leading to an accident, do get your gadgets serviced by an expert locally. This always helps in enhancing the life of your gadgets as also takes care of any accidents etc.

You would be glad to learn the we successfully conducted a three days training program on Baggage Scanning & Image Interpretation Course from 26<sup>th</sup> to 28<sup>th</sup> Feb 2018.

The Executive Committee Meeting of the previous month was held on 22<sup>nd</sup> Feb 2018 at the Executive Chairman's official residence at Humayun Road, New Delhi. The meeting witnessed a large participation with very meaningful discussions on a range of issues.

Wishing you safe fortnight ahead.

Good Luck & God Speed!
