## Editorial

Dear Readers,

Last year in July 2021, we were yearning for normalcy in life, and the nation was getting on the grips over the second wave of Corona. While going through the previous year's statistics, the number of new cases everyday was pretty close to 50,000 per day, a happy sign that the virus was on the wane, given the onslaught we faced in the month of April, May and Jun'21. We experienced it from very close quarters. Since then we have come a long way and completed over 200 crores of vaccine doses administered and confidently say that we have achieved the desired level of immunity. Possibly that is the reason that Omicron variant had a very little or No impact in India. Although, the world is much safer today despite 1 million cases are being reported on a daily basis, mostly from Japan, Germany and other EU nations and USA and almost 2000 deaths are being reported on a daily basis. Presently, over 30 cities of China are under severe lockdown with a daily average of 150 cases with NO death or fatalities due to Zero Covid policy of the government. It leaves much to the readers' imaginations as to why these many cities are shut enmasse, has impacted the global supply chain adversely. Just to wrap up the issue of health safety, Monkey Pox, a new virus is on the rise and spread over 70 countries. The WHO has issued a warning in this regard and declared that the 'Monkey Pox' is a global Pandemic now. Indian vaccine manufacturers are working overtime to produce anti-virus for the same. We only hope that this does not become another full scale health emergency!

We are already in the rainy season and much of North India has received bountiful of rains and that has caused lot of damage in the country, baring few states like UP, Bihar, Jharkhand and some other parts of Eastern India which is experiencing draught like situation. On the other hand, North Eastern and Western states have been experiencing heavy rains and remain submerged over a month. Meanwhile, incidents of cloud bursts, lightning strikes have taken many lives. While India and some of the Asian countries (like China and Japan) is experiencing heavy rains and floods; other parts of the world, specially European countries are experiencing serious heat waves, so much so that people are seeking refuge on the sea shores. These extremes are nothing but the fall out of global warming and climatic change. I feel this is only the beginning and will worsen in future until some innovative and tough measures are taken by the global community. But at this moment, it does not seem to be happening. Sad but True!

Finally, I will touch upon Russia – Ukraine War which is going on since over five months. The negative impact of this war is already being felt across the world. Economies are collapsing, political systems are crumbling and people are on the streets asking for relief. Inflation and recession both (negatives) have hit the world. There are serious shortages of fuel in many countries and cost of items of daily needs are going beyond the common people. In Sri Lanka, people are on the streets and both the President and Prime Minister (from one family only) have ran away from the country. The situation in Pakistan is no better and being touted as if it is going to be another Sri Lanka. The world is going to face serious food shortages, if the supply of wheat is not resumed immediately from Ukraine and Russia. But that appears to be under jeopardy despite an agreement reached between Ukraine and Russia under the mediation of UN and Turkey. Hope good sense prevails!

To conclude, I would like to say that we are going through a critical time in the history of mankind. We have to live with multiple viruses, global climatic disorders and worse, the War! It is good that we have learnt 'how to live with the viruses and deal with them' but surely we are not prepared to face the extremes of climatic changes and the War!

**At the end, I wish you all the very best for the forthcoming Independence Day! Jai Hind!**

Yours' Sincerely,

Col (Dr.) MP Sen

# IISSM Knowledge Session: 27 June '22

## on

### Cyber Threat: Awareness, Preparedness and Loss Prevention

**Introduction:** The IISSM has been founded with an aim to proliferate awareness in the field of Security and safety for over three decades. In this endeavour, the IISSM has trained thousands of professionals over three decades, organising International conclaves and seminars. Towards this we have been conducting series of events like Conclaves, seminars, webinars and knowledge sessions regularly. In this endeavor, we organized a knowledge session on 27th June 2022 on the topic “Cyber Threat: Awareness, Preparedness and Loss Prevention”.

**Speakers and the Topics:** There were two speakers viz. Dr. MJ Shankar Raman, CEO, Pravartak, IIT Madras and Col (Dr.) Inderjit Singh Barara (Retd), CIO, Vara Technologies. Both the speakers are well known as the thought leaders in the field of Cyber Security and associated technological issues. The topics were as under:

Dr. MJ Shankar Raman – “Cyber Threats Vs Conventional Threats: Importance in Loss Prevention”.

Col (Dr.) Inderjit Singh - “Emerging Threats and Cyber Defence: Awareness and Preparedness”

**Conduct of the Sessions:** The sessions were conducted on the virtual platform and attended by large number of people. The speakers delivered their talks followed by question and answer sessions. The subjects were so relevant and very well received. Finally the Knowledge Session culminated with the Closing Address by Mr. S K Sharma, IPS (Retd), Chairman, IISSM and Vote of Thanks by Mr. R K Medhekar, DG, IISSM. The session was also attended by Mr. Uday Singh, Chairman, IISSM Foundation.

## OBJECTIVE

Today's Security professionals are of the precipice of uncertainties of times due to cruel business environments. Crisis may occur at any point of time as best of the companies are moving from physical guarding based security system to high end technology based systems which are based on information systems. In addition, it may be possible that position of Chief Security Officer (CSO) be scrapped and taken over the CISOs. Now-a-days many of the Security officers are B.Tech (Computer Science) who need to upgrade themselves with the latest systems and practices, so that they can aspire to be upgraded as CISOs in due course.

## DESCRIPTION

The training will be through a judicious mix of lectures, presentations, analytical discussions on a virtual classroom mode to cover the following:

- Information Security and Data Protection, Cyber Threats and Vector of Attack.
- Information Security, Governance and Framework.
- Info Security Risk Management.
- Digital Transformation, Disaster Recovery and Incident Response Management.
- Cloud Computing, Endpoint Security, DLP and ERP Management.
- Blockchain Technology.
- AI, Big data and IOT Security.
- Cryptography and Ethical Hacking
- IT Laws and Indian Cyber Security Organisation and Policy.

## COURSE DIRECTOR

Col (Dr) MP Sen (Retd) is highly accomplished professional with 32 years of experience (21 years in Army) in the fields of Telecom infrastructure business, Cyber Security and Defence Strategy. In addition, he also has been into the education as CEO of Manudhara Education Group and raised Manudhara Defence Academy at Laxmangarh, Rajasthan.

He is M.Sc (Physics), M.Tech in (Telecom & IT), M.Sc (Defence & Strategic Studies), PGD(HR) and Ph.D from Jadavpur University, Kolkata.

Presently he is the Director - Courses of International Institute of Security and Safety Management, New Delhi.

# PSOs Course on Security Management

(Virtual Class)

16 - 18 August, 2022

1000-1700 hrs.

## Who should Attend ?

- Head – Security, HR and Admin.
- All PSOs.
- Senior Managers looking after VIP Protection.

## General

Today due to fast changing technology, Security risk for the high net worth people, business leaders and others may feel that there is a need to have personal security professionals who are not only trained in defensive skills but also agile enough to adapt to the new challenges. This manpower intensive is also need to be suitably upgraded for giving all-round protection but also in a position to save the Principle, whom they guard.

## Description

The Security Professionals are required to address various types of issues in day to day life. To help address the ever increasing security challenges, newer technologies are being inducted regularly to augment the Security efforts in the field of VIP/Executive protection. Because of these changes in the field, Personal Security Officers need to refresh their knowledge on the current risks, evolving threat perceptions and the methodologies to mitigate these risks and to use latest techniques in response management. IISSM has, therefore, launched a custom-designed training capsule course to meet these requirements.

The custom-designed training capsule is a judicious mix of lectures, presentations, and discussions in a real-time virtual classroom to cover the following topics:

- Emerging concepts in Corporate Security.
- Risk Management in the changed environment.
- Fundamentals of VIP /Executive Protection.
- Roles and Responsibilities of PSOs.
- Kidnaping and Hostage Management situations.
- IED and Bomb Threat Handling.
- Investigations, Reports and FIR.
- Emergency Response and Drills (Fire & Other Disasters).
- Cyber Threats and Data Security of VIPs.
- Technologies in the field of VIP Security.
- Handling of Medical Emergencies and First Aid.
- New Age Security through Monitoring of Alarms.
- Communication skills and Etiquettes.
