

Editorial

Dear Readers,

Season's Greetings to you all!

We have had a great Season for last four months (Oct-Dec) in India wherein we had loads of festivals and celebrations across the globe which ended with the New Year 2024 celebrations. But we were not free from some unusual events which were challenging for all of us. In fact, from the beginning of Dec'23 itself, we were/are experiencing some bad weather or even extreme weather events, be it in terms of cold waves in the northern hemisphere, severe cyclones in southern parts of India, unprecedented floods in Chennai, Dubai, Saudi Arab and elsewhere, and flooding in multiple countries in Africa and South America and severe Earthquake in Japan, all of these in a span of 3 to 4 weeks. The floods in Middle Eastern countries was something unheard of, where the last COP 28 was held. The outcome of this event was again a mud-slinging match between the two groups viz. global North and the South. The countries who have rampaged the weather for decades and centuries are trying to impose restrictions on greenhouse emissions on the developing nations which is unacceptable to the affected nations. Till such time the global north realises that their sins can't be palmed off to global south countries, and be ready to foot the bill, share the cost of investing in Renewable energy sources, all COP(s) of today or tomorrow will have similar outcomes.

The world is passing through a critical juncture and war clouds are thickening day by day. The sudden act of terror by Hamas has led to Israel-Hamas war and raging for almost three months with no signs of curtain being drawn in the immediate or near future. In fact, it is otherwise. Hezbollah and Houthis of Yemen (allegedly supported by Iran) have jumped into the fray and umbrella of war is slowly but surely expanding. On the other side, the Russia -Ukraine War is gaining impetus and thus

we can say that war has fanned out of EU and NATO countries and engulfing Middle East Asia and South Asia is not far. Also the tension at South China Sea hasn't eased out and can flare up any moment. This kind of situation is certainly not for global peace and Business. Although, many of the industries will see opportunities in this situation too. But none is bothered to stop the war which is adding tonnes of fumes and toxic elements in the air, for which they gather to discuss the topic of Climate Change and Disaster.

Although we have entered into a New Year 2024, but peace and security situation of the world is fairly stressed. In addition, new variant of Corona Virus JN1 has surfaced and that is sweeping the India very fast and that is a matter of concern for all of us. In fact, last five years from 2019, we are going through tough times and all the indicators are pointing towards a more challenging times ahead, be it in terms of disasters, climate change and the wars. I do not wish to be Nostradamus or Dr. Dooms in any manner but as a security professional we can say that things are not moving in positive direction.

But there is some silver linings on the horizon. We are fast approaching the Uttarayanam phase of Sun's movement towards North or tropic of Cancer on 14 Jan and will usher into four days of celebrations of Pongal, Maagh Bihu in Assam, Lohri in Punjab and Sankranti in rest of the parts of India. Hope that these events will bring some cheers.

With this hope, Let me wish you a very Happy, healthy and prosperous New Year 2024!

**Jai Hind!
Col (Dr.) MP Sen**

33rd ISSM Annual Global Conclave : **Legacy of Successful Conduct with Finesse Repeated**

I am extremely delighted to inform the readers that we have concluded our 33rd Annual Global Conclave. This year's theme is **“Disasters, Climate Change, and Security: Business Leadership, Innovation, and Building Resilience (BLIBR).”** This is the pressing need of the hour and to address this issue. The consequences of climate change and the disruptions caused by disasters alongwith raging wars, makes us to feel the need for protection against these and to create a safer and sustainable world.

Over all conduct of the sessions for both the days were of very high order and it was appreciated by one and all. Two days were packed with events : Key Notes, Special Addresses and Plenary Sessions. The highlight was that the Inaugural address was given by none other than Sri Chandi Prasad Bhatt, Padmabhushan, Raman Magsaysay and Gandhi Peace Prize Awardee who came all the way from

Gopeshwar, near Badrinath. Sri Nitin Jayaram Gadkari and Sri Sarbananda Sonowal, both the ministers of the government of India addressed the Conclave through Video recorded messages.

event was that the IISSM had the unique opportunity to Honour the brave-hearts of NDRF who had given their best to rescue the 41 people who were trapped in Silkyara Tunnel. The participants were from all across spectrum of Industries.

All the sessions were of very exciting in terms of knowledge sharing, debate and strategies discussed on Disaster Management. Another highlight of the

The details of the sessions will be published in our Annual Report on the Conclave.

Terrorism: Threat to Hospitality Industry and Risk Mitigation

Suhas Raorane

(Participant of CSP (VC) April 2023 batch)

Today, there are over 1377 star category hotels in India. They range from economy hotels to upscale boutique establishments, luxury resorts and international chains. The threat and impact that terror and pose to them may differ based on factors like their Sizes, Location and Clientele.

Regardless of ideology or method, all terror attacks share the same goal of drawing attention to their cause. Many terrorist groups now have an online

presence, connecting supporters and coordinating large-scale attacks on hotels, malls, and other similar locations.

What makes hotels attractive targets

- Some Hotels have large, constant flow of people.
- Attacks involving international tourists may draw global media attention.
- Attacking hotels can impact the local economy by reducing

tourism.

- It is relatively easy to conduct reconnaissance, find floor plans, photographs, and panoramic video clips of public areas often available over the Internet.
- Hotels hold a host of valuable personal and financial data of their guests, such as payment card details and passport information.
- Hotels are open environments with multiple points of entrance and egress and a constant flow of traffic, including hotel guests and visitors, staff, merchants, and delivery people.

Hotels of all sizes may be targets

The targeting of hotels by terrorist organizations is not a new phenomenon.

The Mumbai Attacks: Transnational terrorism struck the international hotel industry with a vengeance in 2008. On Thanksgiving day, a team of ten highly trained assassins, armed with assault rifles, submachine guns, hand grenades, along with satellite phones, BlackBerries, and other high tech devices, launched a three-day siege in Mumbai, India's financial and entertainment capital, killing 166 and injuring 300. Among their targets were two of the city's landmark five-star properties: the Taj Mahal Palace and Tower and the Oberoi Trident complex. Western tourists and businesspeople appear to have been singled out by the assailants for execution, and the final death toll included 28 foreign nationals, six of which were Americans.

Possible consequences of a terror attack include:

- Loss of lives amongst your employees and guests
- Dramatic drop in tourism and hotel occupancy

- Disruptions to your supply chains
- Damage to your hotel's image and reputation
- Falling revenue as guests avoid hotels that are not properly secured

Key Roles & Responsibilities

Most hotels have similar roles that need to be filled, while larger hotel may dedicate an entire department to one area, smaller hotels typically have single individual filling multiples roles.

But regardless of the scope of their responsibilities, every individual plays an important part in working together with other departments to create a safe, secure environment for other employees and guests.

Protecting Your Workplace

A terror attack at a poorly protected workplace could result in injuries and loss of lives of employees. Hotels can also incur costs from rebuilding, insurance pay-outs, lower profits, the loss of investor confidence and dropping employee morale.

Deter - Implement measures that make potential attackers see your hotel as to difficult, risky or Dangerous to strike.

Delay - Put physical and system barriers to slow the progress of an attack on your hotel, allowing security team to respond and mitigate harm.

Detect- Find and address signs of terrorism as early as possible, lowering the harm or threat they pose.

Deny - Safeguard employees and guests by ensuring that only authorised persons can access important information or areas.

Security Personnel –

- Ensure all employees are familiar with ERPs* and evacuation plans, and instruct them to avoid Assembly Areas during terror incidents.
- Establish lockdown procedures and secure emergency storage or shelters
- Create guidelines to act on the presence of suspicious vehicles, people or items

Non-Security Operations –

- Apply procedures to verify guests' identities if keys are lost
- Stay alert to possible signs of terror related activity
- During a crisis, help to ensure all guests are accounted for and kept aware of any developments that may occur

Senior Management -

- Create business continuity and communications plans for terror attacks
- Regularly evaluate and upgrade security measures in exterior and interior areas

Responding in the Event of a Terror Attack

In the event of a terror attack, knowing how to respond swiftly and decisively amidst the chaos can make the difference between life and death.

- If at the site of an attack, Run, Hide, and Tell
- Immediately Perform Improvised First Aid Skills (IFAS), or Press, Tie and Tell, to stop the bleeding of casualties
- Cooperate with appointed hotel employees and security personnel as they evacuate employees and hotel guests
- Instruct employees and hotel guests

to run as far as possible from the site of attack Find remote ways to check on the safety of employees (e.g. update on safety status via group chats)

- Provide the police and authorities with any relevant information to facilitate investigations
- Avoid circulating internal information, photos, or videos via social media, as doing so may create unnecessary panic and misinformation

Identifying Terror Threats

There is no single feature that will identify an individual as a terrorist, or evident signs that a place is about to be attacked. However, many terrorists follow similar patterns when planning or preparing to attack a site.

How might a terrorist threaten your hotel's security?

Collect information to plan an attack

Action Taken - Taking photos of restricted areas, security personnel, security cameras, etc.

Asking about how many people will be around at different times, what your security strength is, which areas are restricted, etc.?

Test your Hotel security

Action Taken - Pretending to be lost and attempting to open locked doors or enter secured areas.

Setting of Fire and Security Alarms to learn how long authorities take to respond .

Saying they have lost their room key and need a replacement, without providing any ID

Raise funds and get supplies

Action Taken - Leaving a booked hotel room vacant, and using it as

an address for packages and supplies to be delivered to Meeting with supporters and holding discussions in a hotel room

Prepare to attack, or carry out an attack

Action Taken - Leaving behind a bag or small object and watching how long it takes before it is noticed, reported or picked up by security Sending in people to walk around the premises and planning.

Identifying Terror Threats by Various Operational departments

Front office, Lobby and Concierge department Employees working in public areas, such as the concierge and reception, mailroom and F&B areas should be on the alert for suspicious behaviour from guests and visitors. Security personnel and maintenance employees also have a responsibility to react promptly by investigating any possible security breaches.

- Attempting to hide their identity or not giving personal details when checking in
- Parcels or packages which seem odd (no address, strange sizes)
- Using cash for big purchases, or a credit card which does not match their name
- Investigating hotel entrances and exits, or trying to enter employee-only areas
- Strongly refusing help to carry or move heavy luggage
- Baggage left unattended or abandoned in out of the way places

Housekeeping Department

Employees in Housekeeping should always be looking out for signs of suspicious behaviour or activities. These include actions like refusing to have their room cleaned, occupying their room for long

periods, or meeting with unauthorised visitors.

- Detailed notes or maps of places of Tourist attraction.
- Excessive amounts of baggage for a room with few guests
- Weapons, ammunition, or materials to make a bomb-like screws, nails or ball bearings
- Electronic components, electrical tape, batteries and wires
- Fire alarms or smoke detectors being tampered with (i.e. removed or disabled)
- Burn marks or odd discolorations on furniture that were not previously present
- Strange chemical odours, like cleaning solvents and fuels.
- Parcels with excessive use of adhesive tape, boxes and receipts for chemicals

Trainings to Employees.

- To train the team on Trainings like See something say something.
- Preventing and reacting to Active attack solutions.
- Lockdown procedures
- Mock drills with Local police, Fire department and ATS Team.

Conclusion

Terrorism has become a global threat, which needs to be controlled from the initial level. The law enforcing agencies alone cannot control terrorism. The people in the world will also have to unite in order to face this growing threat of terrorism and always be vigilant about suspicious behaviour from individual person around them this will help to save life and create damage to the society. If you see, something say something.

COURSE REPORTS
**Access Control and Security Management
(26-28 Oct 2023)**

The IISSM has conducted Access Control and Security Management (ACSM) Course for 3 days duration from 26-28 Oct 2023 (Weekdays Course). There were two participants from Bahrain and rest 04 were from Kerala and Delhi NCR.

The sessions covered the topics like Overview of Access Control and Security management, ESS systems, Visitor Control and Parking Management, Artificial Intelligence in Access Control, Drone's Utility and Security Management, Cyber Security and Data protection, Technological Advancements and Latest Trends in Access Control, Security Operations Centre and Alarm Management, Remote Monitoring of Security and Response Management and Risk Management etc.

There was discussion on various topics related to Access Control, Control Centre operations, Drone deployment, Legal Issues and Cyber Security and received an Excellent Response from both the Participants.

The Faculty Members who conducted the Course were:
Brig AK Pathak (Retd) and Col (Dr.) M P Sen (Retd): IISSM Faculties
Col Sougata Das (Retd) & Mr. Anubhav Jaiswal: Guest Faculty
Mr. S Thamodaran : Visiting Faculty Joined Online

The participants have shown great interest in our activities like Seminars, Conclaves and Membership in addition to future association.

Overall, the course was very well appreciated.

Few Quotes from Participants on Overall Assessment of the Course are mentioned below:-

Mr Muhammed Shefiq Siddique, Service Coordinator, VProtect India, Gurugram

"This three-day course with different subjects will be very helpful in my future professional career and develop my present organization security protocols"

Mr Srinivasan Nair, Executive, Safety & Security, Ebrahim K. Kanoo B.S.C. (c), Bahrain

"This course is actually useful to us, so we can train our subordinate"

Mr Amit Kumar Singh, Manager - Profit Centre Head, SLV Security Services Pvt. Ltd., Gurugram

"It is a good programme, which will be useful and enhance our security on ground. Overall, it is a good and satisfactory"

45 Lakh+ Criminals Registered

40,000+ Criminals Identified

18, Terrorist Modules Busted

Use Cases

Perimeter Security

Keep a check on the perimeter security & get alerts for any foreign movement or other abnormal activity near the property.

Facial Recognition

Enhance security by detecting & sending real-time alerts of unauthorized access to restricted areas.

Intrusion Detection

Get real-time alerts for any intrusion along with footage of the incident allowing rapid verification of the source and take action.

Abandoned Baggage Detection

Get a notification for an unattended item left behind on the premises.

Fire & Smoke Detection

Decrease the harm & boost fire control efforts by giving the early sign notifications for something that could be disastrous.

Automatic Number Plate Recognition

Identify vehicles' number plates automatically to improve security & manage real-time traffic.

Unique Visitor Count

Gain qualitative insight like the number of visitors on an hourly, daily or monthly basis and get new sales opportunities.

Demographic Analysis

Develop the understanding of gender & age of your audience using statistical analysis that will help in shaping marketing strategies.

Baggage Scanning and Image Interpretation Course (20-22 Nov 2023)

The Baggage Screening and Image Interpretation Course has been conducted at IISSM, New Delhi on 20-22 Nov 2023. The course has been designed and conducted entirely in house and by making full use of the X-Ray machine (Rapiscan 620XR) and Simulator Software (Quadratica, UK).

There were total of 06 participants on the course. Two participants were retired defence personnel and four were from security and Airlines background. They came from Kangra (HP), Pune, Dehra Doon and Delhi (NCR). The sessions were based on theoretical training (classroom), Simulator Based Training on CBT package and Practical training on X-Ray machine. The subjects covered are : X-ray Technology and uses for security

purposes, Technical aspects of X-Ray machine, control panels and functions, security features and precautions, basic interpretation using various (density, chemical composition and colour coding) methods, techniques to identify hazardous, prohibited items, IEDs, daily usage items and comparison with actual items and X-ray images and Test procedures using CTP Box. Large number of bags was prepared for training and Tests.

The following Faculty Members conducted the Course :-
Brig AK Pathak (Retd) & Col (Dr.) MP Sen, IISSM: In house faculty
Mr. Imraan Shaikh from Mumbai (Visiting Faculty- Online).

The following Members of the IISSM staff assisted:-
Mr. Vinod Rawat: on Simulator Software
Mr. Deepak Bhardwaj: on X-Ray machine.

All the Participants were very impressed with the Course and expressed that they would propagate this programme to be attended by their colleagues in the profession. They also felt that this course should be attended by all Security Professionals.

Overall, the course was very well received and appreciated by the participants.

Few Quotes from Participants on Overall Assessment of the Course are mentioned below :-

Mr Adil Akbar Sayyed, Ground Operation & Inspection Coordinator, Maharashtra

"It is a top-quality course. Keep going. We need this type of course to improve our studies. Excellent. Thank You"

Mr Balbinderpal Singh Math, AM – Training, SIS Ltd., Delhi

"Excellent Course"

Mr Suraj Thakur, Executive - Cabin Crew, Delhi

"It is very helpful for career"

PROTECTED

CERTIFIED INFORMATION SECURITY PROFESSIONAL (CISP)

OBJECTIVE

Today's Security professionals are at the precipice of uncertainties of times due to cruel business environments. Crisis may occur at any point of time as best of the companies are moving from physical guarding based security system to high end technology based systems which are based on Information systems. In addition, it may be possible that position of Chief Security Officer (CSO) be scrapped and taken over the CISOs. Now-a-days many of the Security officers are B.Tech (Computer Science) who need to upgrade themselves with the latest systems and practices, so that they can aspire to be upgraded as CISOs in due course.

DESCRIPTION

The training will be through a judicious mix of lectures, presentations, analytical discussions on a virtual classroom mode to cover the following:

- Fundamentals of Information Technology & Information Security
- Information Security Governance, Policies and Procedures.
- Digital Transformation Strategy and program Development.
- Disaster Recovery & Business Continuity Management.
- Cyber Security and Cyber Resilience.
- IOT, Endpoint Security and Data Loss Prevention.
- Artificial Intelligence and Cyber Security Applications.
- Data Centre Operations and Risk management.
- Information Security Incident & Response Management.
- Dark Web
- Cloud Computing and Cloud Security.
- Info Security Risk management.
- Cyber Laws and IT Act 2000.
- BlockChain and Bitcoin: Technology, Security & Applications.
- Information Security Management Case Study.

COURSE DIRECTOR

Col (Dr) MP Sen (Retd) is highly accomplished professional with 32 years of experience (21 years in Army) in the fields of Telecom Infrastructure business, Cyber Security and Defence Strategy. In addition, he also has been into the education as CEO of Marudhara Education Group and raised Marudhara Defence Academy at Laxmangarh, Rajasthan.

He is M.Sc (Physics), M.Tech in (Telecom & IT), M.Sc (Defence & Strategic Studies), PGD(HR) and Ph.D from Jadavpur University, Kolkata.

Presently he is the Director – Courses at International Institute of Security and Safety Management, New Delhi.

**"IISSM is one among the very few
Training Institutes, which has its
own Rapiscan 620 X Machine".**

Who all should attend:

Security Officers/ Supervisors of Banks, Hospitals, Hotels, Surface Transport Industry, Mining Agencies and all others related to Security & Safety.

Objective:

The IISSM has structured a unique, holistic and experiential four days Orientation Program on "Baggage Screening & Image Interpretation" for Security Practitioners.

Contact :

Ms. Rajshri Kumari on 9999211650

Mr. Vinod Rawat on 9582026101

Course Director:

Col (Dr) MP Sen (Retd) is highly accomplished professional with 32 years of experience (21 years in Army) in the fields of Telecom Infrastructure business, Cyber Security and Defence Strategy. In addition, he also has been into the education as CEO of Marudhara Education Group and raised Marudhara Defence Academy at Laxmangarh, Rajasthan.

Presently he is working as the Director – Courses at International Institute of Security and Safety Management, New Delhi.

Course Contents:

This being a four Days Orientation Programme, the following topics will be covered :

- Relevance of access control in context of X-BIS
- Overview of X-Ray machine & its functions
- Major components of a basic X-ray machine.
- Introduction to Control Panel & its various Controls.
- Safety features built in the machine.
- Safety precautions to be followed by X-ray machine operator.
- Basics of Interpretation using

density, chemical composition and colour coding.

- How to identify the dangerous items as well as dangerous items in disguise from X-Ray image.
- Identification of Hazardous / Prohibited items.
- Baggage categorization based on X-ray interpretation.
- IED, its components and the technique to identify them.
- Familiarization of daily use items with Actual Photographs and their respective X- Ray images.

SECURING CHILDHOOD, BUILDING FUTURE, SPREADING HOPE...A JOURNEY OF BAL RAKSHA BHARAT

For the last 15 years, Bal Raksha Bharat (also known as Save the Children) has been helping children reach their full potential, tap opportunities and get a real chance at building a Secure Future. Joining forces with government agencies at every level – from Panchayat to the Union Ministries – we leverage the Power of Partnerships to drive change in children’s lives. Since 2008, more than 1 crore children have benefitted from our work. We are currently present in 15 states and 3 Union Territories of India and in 2022-23, we were able to impact more than 13.8 lakh young lives.

HERE'S HOW OUR INTEGRATED APPROACH MAKES A DIFFERENCE IN CHILDREN'S LIVES:

For children to build a childhood which is truly secure, they need support at various levels and this is what we are determined to make happen. We work to help build the foundation of a Secure Childhood for children so that they have the resources and means to build a robust tomorrow and contribute towards the nation-building process. Here's how we do it:

Our journey:

For the last 15 years, Bal Raksha Bharat has been relentless in its pursuit to help children brave the odds and build a fairer, safer, happier and healthier childhood. Here's a snapshot of our work in the year 2022-23, which was made possible through the support of our generous donors. We could reach 3,43,948 children through our projects in Health & Nutrition. 6,21,931 children could be reached through our various Humanitarian interventions. 2,05,535 children could be reached through our interventions on Child Protection. 3,32,873 children reached through our education interventions while 96,994 children and youth were reached through projects addressing Poverty and bringing Inclusivity.
